FY03 MEPRS/EAS IV CHANGES

1. FCC Master Table: No new FCCs were added to the FY03 FCC Master Table. However, two Functional Cost Codes (FCCs) changed descriptions in FY03. These are FCA (MED CARE IN NON-UNIFORMED FACILITIES changed to PURCHASED/REFERRED CARE) and FCC (CHAMPUS BENEFICIARY SUPPORT changed to SUPPORT TO NON-FEDERAL EXTERNAL PROVIDERS). In addition, FCCs GCA (READINESS TRNG CONDUCTED LOCALLY) and GCB (OTHER READINESS) are deactivated effective 30 Sep 02.

2. Data Set Business Rules: EAS IV business rules have been updated for FY03. The changes are noted below:

- The DEB% business rule moved from 224 to 314 allowing A%, B%, C%, D%, F%, G%, and __X_ FCCs but not E%.
- Business rule 311 for DDD% and DDE% removed D% FCCs from the standard include list.

3. Allocation Factors: EAS IV allocation factor descriptions have been updated for FY03. The changes are noted below:

ARMY MEPRS REFERENCE GUIDELINES, FY03

Allocation Factor Cd	FY02 Allocation Factor Description	FY03 Allocation Factor Description
SPEC PROG EQUIP COST	SPECIAL PROGRAMS EQUIPMENT COST	SPECIAL PROGRAMS EQUIPMENT COST (DEPRECIATION)
READINESS EQUIP COST	READINESS EQUIPMENT COST	READINESS EQUIPMENT COST (DEPRECIATION)
DENTAL EQUIP COST	DENTAL EQUIPMENT COST	DENTAL EQUIPMENT COST (DEPRECIATION)

In addition, the Allocation Factor FCC3 beneficiary category indicator rule for FCC DAX% changed from Y (Yes) to N (No) in FY03.

4. Service Units: The EAS IV service unit code, OBS, will use Data Set ID Outpatient Visits versus Total Visits beginning FY03.

ACCOUNT SUBSET DEFINITION (ASD)

1. Functional Cost Codes (FCCs): The fourth level of each FCC (B-Z) will be used to identify location of work center unless otherwise indicated. The fourth level in this document will be indicated with an underscore.

- a. The same FCC cannot be used with a different DMIS ID (i.e., BFEB/0001 and BFEB/0002) within the same MEPRS reporting MTF. STANFINS does not contain DMIS IDs; therefore, the financial mapping of expense data is done in EAS IV based upon the FCC/DMIS ID combination on the EAS IV ASD Table. When multiple FCCs with different DMIS IDs are established on the ASD Table, EAS IV does not know which FCC/DMIS ID combination is valid. Therefore the expense data is mapped to the latest FCC/DMIS ID entry created on the EAS IV ASD Table.
- b. "Z" Coding Conventions: Occasionally, an MTF will have a clinic or activity that does not fall into a standard FCC account. In such cases, interim, or "Z" codes may be used at the third level. These codes are designed to allow the system to accommodate new specialties while new permanent codes are being established. By

ARMY MEPRS REFERENCE GUIDELINES, FY03

convention, accounts that are "not elsewhere classified" are identified with a "Z" at the third level. The Army MEPRS Program Office (AMPO) and TRICARE Management Activity (TMA) must approve the use of all "Z" codes in Army MTFs.

2. DMIS IDs: FCCs and DMIS IDs must be correct in both the feeder systems and receiving system. This includes UCAPERS, CHCS, and EAS IV. EAS IV validates all Functional Cost Codes (FCC) and DMIS IDs on all imported source system data. EAS IV validates the Parent and Child DMIS ID combinations and the FCCs against the DMIS ID Table and the FCC Master Table, respectively. Both of these tables can be found under Miscellaneous Standard Tables in EAS IV. EAS IV validates the FCC/DMIS ID combination against the Account Subset Definition Table which is located under Site-Specific Tables.

- a. Ensure that all Dental FCCs reflect a dental DMIS ID. This includes EBAN, the dental clinics located in the MTF, and CAA0 and CAA5.
- b. The Veterinary FCC's and DMIS ID's should reflect the location of the function. For instance, all veterinary functions performed at the same location should have the same DMIS ID.
- c. Work Centers in Army Health Clinics (AHC) will use the same fourth level if possible, with the appropriate DMIS ID. Example: BAAQ/0444, CAAQ/0444, BHAQ/0444. Support services for the same clinic will also use the same fourth level identifier such as EBAQ/0444, EDAQ/0444.
- d. DMIS ID's are updated every month. Basic changes must be submitted NLT 30 days prior to the end of the month (EOM). In EAS IV, each FCC must have a corresponding DMIS ID. Example, BAAA/0001 is Internal Medicine Clinic at Redstone Arsenal.

3. Assignment Sequence Number (ASN): **The ASN order changed from FY02 to FY03.** The ASN will be assigned to each "D" and "E" account on the ASD Table. Correct ASNs are vital in assuring that Allocation is performed correctly. The following is the allocation sequence of the "D" and "E" accounts when Support Services are provided by contract or by an installation support service. When the Support Services (those accounts in **BOLD** and

ARMY MEPRS REFERENCE GUIDELINES, FY03

indented) are manned by the MTF (Example: WRAMC), they will be moved in the Allocation order so they will distribute expenses after the 'EB' accounts and before the "EG" accounts (Biomedical Equipment Repair).

DATA SET GUIDANCE

1. There is a data set ID for each FCC/DMIS ID combination used in the allocation process. All 'D' accounts, 'E' accounts, and cost pools have a corresponding data set with the appropriate DMIS ID and FCC includes and excludes list. Data for the data sets are either entered manually, received from CHCS/WAM, created from other data sets, or created from the FTE file received from UCAPERS/DMHRS. To establish the include and exclude lists, use the FY03 Data Set Guidelines.

2. Data Set Rollover: During Table Migration, the last recorded FY02 values for SQ FT, SQ FT CLEANED, EAC%, EAD%, and EAE% data sets roll forward with their values to FY03. The values on these data sets roll forward to all 12 months in FY03. Additionally, when a workload data set record is adjusted or added, it will be rolled forward to the end of the FY at the time it is adjusted or added.

3. Logistics 'EEAA' Data Set: SCR 004044 has been submitted to automatically create the EEAA data set. Until this SCR is developed and implemented, the following information is provided

ARMY MEPRS REFERENCE GUIDELINES, FY03

to gather the information needed to manually populate this data set.

- a. Open the Direct Expense Accepted Report located in Standard Reports.
- b. Refresh the report to get the most current information for the processing month.
- c. Click on any EOR in the report. This highlights all EORs on the report.
- d. Click on the 'filter' button (looks like yellow funnel).
- e. In the drop down box, click on the first 26** EOR that appears, hold down the 'shift key, then click on last 31** EOR. This will highlight all 26** and 31** EOR's. Click the OK button.
- f. This creates a report sorted by FCC, all 26** and 31** EOR's, sub-totals at each FCC code and grand total at the end.

4. Square Footage: The square footage of buildings owned by the medical facility will be reported by FCC of each work center to include mechanical and electrical rooms, overhang entrance ways, etc. Common areas not identified to a specific area will be charged to EBAA. Common areas located in a Troop Medical Clinic (TMC) will be reported against the FCC's located in the TMC. Army Health Clinic common areas are reported against the appropriate EBA* FCC. As a general rule, total square footage for each FCC will be equal to or larger than the square footage cleaned.

5. Square Footage Cleaned: Report the square footage cleaned for each FCC. Common areas that cannot be logically charged to any work center will be charged to EFA*. Do not multiply the square footage cleaned by the number of times cleaned. The total square footage cleaned will normally be less than the total square footage of the MTF.

6. Healthcare Support Services accounts 'FC': For data imported from the Composite Health Care System (CHCS), when the incoming Requesting Functional Cost Code (FCC) is an FC account for an

ARMY MEPRS REFERENCE GUIDELINES, FY03

ancillary dataset, the Requesting FCC/DMIS ID is validated in the following order:

- a. Step 1: EAS IV will check the Requesting FCC/Requesting DMIS ID combination on the Account Subset Definition (ASD) Table; if it is a valid combination on the ASD Table, no error will be generated; if it is not a valid combination on the ASD Table, EAS IV will proceed to step 2.
- b. Step 2: EAS IV will check the Requesting FCC/Providing DMIS ID combination on the ASD Table; if it is a valid combination on the ASD Table, EAS IV will replace the Requesting DMIS ID with the Providing DMIS ID and no error will be generated; if it is not a valid combination on the ASD Table, EAS IV will proceed to step 3.
- c. Step 3: EAS IV will check the Requesting FCC/Parent DMIS ID combination on the ASD Table; if it is a valid combination on the ASD Table, EAS IV will replace the Requesting DMIS ID with the Parent DMIS ID and no error will be generated; if it is not a valid combination on the ASD Table, EAS IV will leave the original Requesting FCC/Requesting DMIS ID combination on the record and will produce an error in the Error Correction Unit.

PERSONNEL GUIDANCE

1. Currently, EAS IV does not have edits to stop contractor salary expenses and nonavailable FTE/workhours from coming in from the personnel systems, resulting in incorrect data being reported. An SCR has been submitted with the following recommendations:
 - a. Create an exception code that results in an error when salaries are received from the personnel source system on a personnel record that maps to DoD SEEC Category 5 (Contractual Services).
 - b. Create an exception code that results in an error when nonavailable workhours or nonavailable FTEs are received from the personnel source system on a personnel record that maps to DoD SEEC Category 5 (Contractual Services).

ARMY MEPRS REFERENCE GUIDELINES, FY03

- c. Create an exception code that results in an error when a personnel category code other than X is received from the personnel source system on a personnel record that maps to DoD SEEC Category 5 (Contractual Services).
- d. In Personnel Adjustments, limit the personnel category dropdown list to X for personnel records that map to DoD SEEC Category 5 (Contractual Services).

Until such time that the SCR is implemented, sites should not report salary expenses and non-available FTE/workhours for contractor records.

FINANCIAL GUIDANCE

1. Based on questions from the sites, the following information is provided to understand what happens when a Standard Finance System (STANFINS) file is processed through System Interfaces in EAS IV.

- a. COPY: The STANFINS file is copied into EAS IV and data is available in it's "purest" state on the pre-imported data tab. The data on this tab is not available in a report. However, a report can be produced by opening the file in Notepad and printing it.
- b. IMPORT: The STANFINS file is imported into EAS IV. During import, the mappings occur such as the deactivated EORs are mapped to active ones, the incoming SOFs are mapped (incoming A and F SOFs are changed to an R; incoming blank SOFs are changed to a D; otherwise they remain as on the incoming record, (D)irect, (R)eimbursible or (S) Resource Sharing). Since the Parent DMIS ID is not contained in the STANFINS file, it is mapped using the Allotment Serial Number and Operating Agency (ASN/OA) and Parent DMIS ID on the ASN/OA Table to the Parent DMIS ID of the user currently logged on to the system.
- c. VALIDATE: Several actions occur prior to the file being validated:
 - 1) Obligations received for military pay, free receipts, reservists, or depreciation are retained in the pure file only;

ARMY MEPRS REFERENCE GUIDELINES, FY03

- 2) Incoming prior year obligations (obligations associated with a prior year on the incoming record) are retained in the pure file only;
- 3) Personnel records (salary expenses) contained in the STANFINS file are retained in the pure file only. Personnel records in the STANFINS file remain in the pure file because the personnel records from UCAPERS records are used instead. Otherwise, a duplication of salary expenses would be experienced. The system determines if a record is a personnel record by the Service-unique Expense Element (SUEE). This is done by mapping the SUEE to a Standard Element of Expense Code (SEEC) which, in turn, is mapped to a SEEC Category and ultimately to a Schedule Type P = Personnel or F = Financial). Immediately below are the SEECs mapped to the SEEC Categories and below that are the SEEC Categories mapped to the data type. Note, no records are ever deleted for the Army without user intervention.
- 4) All FCC/DMIS ID combinations and expense codes are validated against the appropriate table in EAS IV. Additionally, beginning with the second month of the fiscal year (November), the edits for current financial records versus previous financial records (E0009) and previous financial records versus current financial records (E0011) begin.

ADDITIONAL TERMINOLOGY/DEFINITIONS/GUIDANCE

1. Order of Processing: In EAS IV, if you change the order in which data is processed, chances are that fewer errors and/or warnings will occur. For instance, if numerous errors and warnings are created each month, try adding the manual entries prior to validating the financial, personnel, and/or workload data types. The reason to do this is because EAS IV validates the incoming file with the most current accepted file. The

ARMY MEPRS REFERENCE GUIDELINES, FY03

system does two types of validation. The first type of validation checks for a record received in the current file that did not have a matching record in the previous month processed. This is a warning for all data types. The second type of validation checks for a record contained in the most current month processed but not received in the incoming file. This is a warning for personnel and workload data types and is simply included to remind users to enter all data prior to the Allocation process. The validation check is an error for the financial data type because the financial file is a year-to-date file and EAS IV uses the year-to-date record to calculate the month net expenses and obligations.

2. Generic Amount Service Unit: The term, Generic Amount, used in conjunction with the Service Unit, indicates the allocation factor for a cost pool. This means that the allocation factor can be anything that gives the best distribution of the cost pool expense. The same values must be used for each requesting FCC, such as, FTE, per cent of time, or weighted procedures.

3. Man hours and expenses will be reported for all FCC's unless otherwise annotated.

4. Case Management: Effective 1 October FY03 Functional Cost Code (FCC) ELA - TRICARE and Managed Care Administration will be also be used to capture Case Management FTEs.

3	MCS Resource Sharing - Non Cash	A/B**9	OBD/TOTAL VISITS
4	MCS Resource Sharing - Cash Reimbursement	A/B**8	OBD/TOTAL VISITS
5	MCS Resource Support	A/B**6	OBD/TOTAL VISITS
6	Other Resource Sharing Observation Unit Visit	A/B**S B**0	OBD/TOTAL VISITS TOTAL VISITS

¹ Ambulatory Procedure Visits (APV) are a by-product of the Ambulatory Procedure Unit (APU). The "5" at the fourth level is used to identify clinical specialties utilizing the APU, such as BAA5, BBA5, etc. These codes are used on the data sets for the APU's. The B**5 MEPRS codes must be recorded on Outpatient Visits and Total Visits Data Sets.

² Ambulatory Procedure Visits (APV) are performed by Resource Sharing providers in an APU. These codes are used on the data sets for the APU's. The B**7 MEPRS codes must be recorded on Outpatient Visits and Total Visits Data Sets.

³ MCS Resource Sharing - Non Cash includes TRICARE Providers & Partnership Visits performed in the MTF.

⁴ MCS Resource Sharing - Cash Reimbursement is a cash payment from the MCS Contractor to the MTF Commander for MTF marginal costs resulting from resource sharing workload where the contractor gets the credit.

⁵ MCS Resource Support - The contractor provides services (supplies and personnel, but no cash) with the MTF providing upfront reimbursement for the services. Resource support is a contracting mechanism for the MTF. There is no BPA impact with resource support.

⁶ Other Resource Sharing - All other non-MCS contract type resource sharing agreements, such as VA sharing agreements.
